

## TECHNICAL DATA SHEET

# CCTV INSTALLATION

### Smart Surveillance. Secure Spaces.

Installation of a CCTV system for continuous security monitoring, including cameras, cabling, recording, and remote viewing setup.

## TECHNICAL DATA

Specification	Details
Camera Type	IP/Analog (depending on deployment)
Resolution	1080p Full HD/4MP/4K (as specified)
Lens	2.8mm/4mm
Storage Capacity	1TB–8TB HDD (expandable as required)
Frame Rate	Up to 30fps per channel
Network Interface	Ethernet 10/100Mbps/Gigabit
Remote Access	Web/Mobile App/Client Software
Installation Components	Cameras, brackets, cabling, power adaptors
Monitoring	24/7 recording

## PRODUCT INFO

The CCTV Installation project involves the deployment of a closed-circuit television system designed to provide continuous video surveillance for enhanced security and monitoring. This includes the installation of cameras, cabling, recording devices, and network components to ensure reliable real-time and recorded footage. The system is configured for optimal coverage of designated areas and supports remote viewing, playback, and storage according to client requirements.

## PRODUCT FEATURES

- Provides clear and detailed footage with resolutions up to 4K.
- Infrared Night Vision for reliable monitoring in low-light conditions.
- Access live and recorded footage securely via mobile app or web browser.
- Supports expandable storage options for long-term video retention.
- Simplified installation.
- Encrypted video streams to protect against unauthorized access.
